FINAL POWERPOINT

Mikhaela Mueller

CIS 420-01

Intellectual 6

REQUIREMENTS

- Top 3 things you learned about teamwork

- Top 3 things you learned about project management

- Top 3 things you learned about Web / application development

- Thinking about the course as a whole, elaborate on the 3 most significant things you learned from this course. How will you use these things in your future career or professional development?

TOP 3 THINGS YOU LEARNED ABOUT TEAMWORK

- Listen to everyone's ideas and opinions, then come to an agreement as a group

- Be willing to help others as everyone has a different understanding of certain topics

- Communication is key!!

TOP 3 THINGS YOU LEARNED ABOUT PROJECT MANAGEMENT

- Try to stay as organized as possible (keep track of dates, roles, what is completed, etc.)

- Scheduling and time management are very important to ensure a smooth and successful project

- There must always be a form of leadership, whether that be one person or multiple people

TOP 3 THINGS YOU LEARNED ABOUT WEB / APPLICATION DEVELOPMENT

- I learned how to effectively use WordPress.

- I learned that web development will take some trial and error and that patience is important.

- I learned that you must focus on the main components of the website, and then on visual appeal.

THINKING ABOUT THE COURSE AS A WHOLE, ELABORATE ON THE 3 MOST SIGNIFICANT THINGS YOU LEARNED FROM THIS COURSE.

Three of the most significant things I learned from this course is:

- When working in a team, you must be flexible. Sometimes there may be members who can't attend a group meeting or someone may have trouble with a task they were given. Being able to adapt to change is important in ensuring a strong group dynamic.

- Communication – Like I mentioned earlier, having good communication skills is crucial to having a successful project. Being vocal about struggles or inconveniences with attending a meeting helps everyone be on the same page.

- Web development is fun! I really enjoyed this course being all hands on. Being able to use the skills that I have learned has helped me feel more comfortable if I were to need this in my career one day.

HOW WILL YOU USE THESE THINGS IN YOUR FUTURE CAREER OR PROFESSIONAL DEVELOPMENT?

- I will use the things listed in the previous slide in my future career by having a better understanding of the importance of communication and how to be a leader. Through the great dynamic between my group mates and I, we were all able to be proud of the work we accomplished. I will take the values I learned from my group mates and echo that in group projects in my career.

- I will also use my technical skills that I learned in this course including how to use WordPress, how to format a website page, and how to implement different systems.

- Finally, I will keep the skill of being organized through my future career. I learned that mastering this skill will prevent any confusion or major errors, especially when working with technology.
